

AMINE HADDAD

FULL STACK DEVELOPER

Casablanca, Morocco | amine.haddadd@gmail.com | +212 629 153814 | <https://portfolio-ahaddad.vercel.app/>

WORK EXPERIENCE

- Groupe TERSEA**
Full Stack Developer
• Developed and maintained a comprehensive call center solution, integrating real-time communication features, dynamic dashboards, and reporting tools to enhance operational efficiency and customer satisfaction.
• Collaborated with cross-functional teams to design and implement scalable front-end and back-end systems, ensuring seamless user experiences and robust performance under high traffic conditions.
- ITSS PARIS**
Full Stack Developer
• Contributed to end-to-end web application development, implementing responsive front-end designs and robust back-end functionalities while collaborating with cross-functional teams to deliver high-quality solutions.
• Successfully managed the migration of websites from Drupal 7 to Drupal 10 and 11, ensuring seamless transitions, improved performance, and adherence to modern web standards.
- ABA-TECHNOLOGIE**
Full Stack Developer
• Worked on over 10 IoT projects for Mediot and Digieye, utilizing React.js for web applications and Flutter for mobile applications. Developed responsive UI components and features, enhancing usability and user experience while optimizing and maintaining existing applications for performance and reliability.
• Collaborated with cross-functional teams, including designers and back-end developers, to deliver high-quality products tailored to client needs. Actively participated in code reviews to ensure code quality and sustainability.

FREELANCES

- APP LOOKER**
Full Stack Developer
• A travel app connecting users with unique short-term accommodations worldwide. From cozy apartments to luxurious homes, it streamlines bookings, enables direct host communication, and curates personalized travel experiences. Built with PostgreSQL, Express.js, and React, AppLooker also facilitates seamless connections between freelancers and clients, fostering enhanced collaboration in a user-friendly environment.
- HD MOVIES+**
FLUTTER Developer
• Crafted with Flutter, this app delivers a premier cinematic experience, providing users access to a vast library of high-definition movies. Seamlessly navigate through a user-friendly interface, discover the latest releases, and enjoy top-tier streaming quality. Elevate your entertainment with a sleek and responsive HD Movies app that brings the magic of cinema to your fingertips.

EDUCATION

- 1337 KHOURIBGA - 42 NETWORK**
